## Network Distributed Password Recovery: Passware Kit Agent

Passware Kit Agent is a network distributed password recovery worker for Passware Kit Forensic. It runs on Windows and Linux, 64- and 32-bit, has linear performance scalability. Each computer running Passware Kit Agent supports multiple CPUs, GPUs, and TPR accelerators simultaneously.

Passware Kit Forensic comes with 5 agents included with ability to purchase more separately as needed.

## Hardware Acceleration of Password Recovery Attacks

Passware Kit Forensic can increase password recovery speed up to 400 times by using a single GPU (Graphics Processing Unit) card, and up to 3,200 times by using 8 GPUs in a single computer. Distribute password recovery tasks over a network of Windows or Linux computers for linear scalability.
